Credit	-	-	16	-	16	Theory	-	-	-
Hours	-	-	16	-	16	Practical	960	640	1600
Pre-requisites:									
Individual design project set to aid a student in his understanding of the complexities and fundamentals of all design dimensions.									
Learning Outcome:									
Theory syllabus									
Unit	Content								Hrs
1	Program formulation and project proposal based on real needs. Arriving at appropriate method of analysis, design processes and issues of design. Resolution of project to address the following: <ul style="list-style-type: none"> • Functions within the built environment. • Interior architecture and interior elements of space making. • Socio-cultural and economic frameworks, behavioral patterns and related use of spaces. • Arriving at synchronized design solution through case studies analysis of data, conceptualization of ideologies and exploration in design. • Integration of various/all required services and technology with its due expression. Focusing on practicality of the project by studying,, available materials and their fabrication systems, surface finishes, textures, method and processes involved in execution. • Integration of actual material samples. • Cost analysis 								
2	Actual prototype sampling of space, furniture and product. Exploration of expressional skills in drawings, 3d views, walk through, and model making								
Practical content									
Independent Projects : Urban interiors: Shopping malls, corporate offices, civic centers, interpretation center, hospitals, jails etc.									
Interior of Ports: Airports, bus-stops, railway stations, boat ports.									
Exhibition spaces: Museums, art galleries, expositions.
