

Programme		BCA Honors (Artificial Intelligence & Machine Learning)				Branch	Computer Applications		
Semester		I				Version	1.0.0.0		
Effective from Academic Year			2026-27			Effective for the batch Admitted in		June 2026	
Subject Code		U91B3DL		SUBJECT NAME		DIGITAL LOGIC			
Teaching scheme						Examination scheme (Marks)			
(Per week)	Lecture (DT)		Practical (Lab.)		Total		CE	SEE	Total
	L	TU	P	TW					
Credit	4		-	-	4	Theory	50	50	100
Hours	4		-	-	4	Practical	-	-	-

Objective:

To provide students with a foundational understanding of the principles and techniques underlying digital systems.

Pre-requisites:

students have a solid foundation in mathematics, logic, and basic engineering principles, which are essential for comprehending the concepts covered in a Digital Logic course.

Course Outcomes :

Name of CO	Description
CO1	Translate various codes and number systems utilized in digital communication and computer systems.
CO2	Utilize circuits for converting codes and number systems, and analyze and contrast various logic families, the fundamental components of distinct logic gates, in terms of economic factors, performance, and efficiency.
CO3	Simplifying and Implementation at the Gate Level
CO4	Gain the capability to create and evaluate combinational logic circuits.
CO5	Develop the proficiency to create and assess sequential logic circuits.

Mapping of CO and PO

Cos	P01	P02	P03	P04	P05	P06	P07	P08
C01	3	3	2	3	2	1	1	1
C02	3	3	2	3	2	1	1	1
C03	3	3	2	3	1	1	1	1
C04	3	3	3	3	1	1	1	2
C05	3	3	3	3	1	1	1	2

Content:

Unit		Hrs.
1	Foundations of Digital Systems and Number Systems Digital system overview, Introduction to binary numbers, Number base conversion techniques, Positional number system, Binary, Octal, Hexadecimal, and Decimal number systems, Representation of signed numbers and signed magnitude, Binary arithmetic operations: Addition, Subtraction, Multiplication, Division	12
2	Boolean Algebra and Basic Logic Gates Introduction to Boolean algebra, Addition and Multiplication in Boolean algebra, Binary logic functions exploration, Logic gates and Truth tables overview, Basic logic gates: AND, OR, NOT, Universal gates: NAND and NOR, EX-OR and EX-NOR logic gates, Boolean rules and Laws, De-Morgan's theorem	12
3	Gate Level Minimization and Realization Realization of switching functions using logic gates, Canonical forms and Standard forms, Sum of product and Product of sum forms, Realization of Boolean functions using universal gates, The map method: Three-variable map and Four-variable map, Logic expression simplification with grouping cell, Quine-McClusky method, Realization of combinational circuits using truth tables	12
4	Analysis and Design of Combinational Circuits Introduction to combinational circuits, Binary Adders: Half adder, Full adder, Binary Subtractors: Half Subtractor, Full Subtractor, Parallel binary adder, Binary comparator or Magnitude comparator, Decoders and Encoders, Multiplexers and Demultiplexers, Parity generator and Parity checkers, Code converter	12
5	Sequential Logic, Counters, and Registers Latches: Active High S-R Latch, Active Low S-R Latch, Gated S-R Flip-Flop, D-flip-flop, Edge-triggered flip-flops: S-R FF, D-ff, J-K flip-flop, Race condition in flip-flops, Master-slave J-K flip-flop, Introduction to counters: Three-bit, synchronous counter, Four-bit asynchronous counter, ripple counter, Synchronous binary up counters: Three-bit and Four-bit, Synchronous binary down counters: Three-bit and Four-bit, Serial In and Serial Out register, Universal Shift register	12
Practical Content:		
Not Applicable		
Text Books:		

1	Fundamentals of Computers by V. Raja Raman
Reference Books:	
1	Digital Design, M. Morris Mano, Pearson education.
2	Digital Circuit and Designs -S. Alivahanan, S. Arivazhagan - Vikash Publications.
3	Modern Digital Electronics: R. P Jain.

Question Paper Scheme:	
	Note for Examiners: Q-1 Must be common from any topics from the syllabus. Q-2 And onwards must be from specific topics and internal choice or option can be given. Paper Structure: SECTION-1 Q-1 Attempt any Five Out of Seven: each question must be 5 marks: (25 Marks) Questions must cover all possible sections (CO1, CO2, CO3, CO4, CO5). SECTION-2 Q-2 Must be from topics: Foundations of Digital Systems and Number Systems: (05 Marks)-CO1 Q-3 Must be from topics: Boolean Algebra and Basic Logic Gates: (05 Marks)-CO2 Q-4 Must be from topics: Gate Level Minimization and Realization: (05 Marks)-CO3 Q-5 Must be from topics: Analysis and Design of Combinational Circuits: (05 Marks)-CO4 Q-6 Must be from topics: Sequential Logic, Counters, and Registers: (05 Marks)-CO5
