To enable students to understand the fundamentals of React JS and develop interactive single-page web applications.

Pre-requisites:

Students should have knowledge regarding HTML, CSS, JavaScript (ES6+ features), and basic understanding of web development concepts.

Course Outcomes :

Name of CO	Description
CO1	Understand the core concepts of React JS, including components, JSX, and virtual DOM.
CO2	Implement state and props management in React components for dynamic UIs.
CO3	Apply event handling, conditional rendering, and list rendering techniques in React applications.
CO4	Utilize React Router for navigation and manage forms effectively in React.
CO5	Develop a simple full-stack web application using React JS for the frontend.
